Managers and warehouse management

Create multiple users who can interface with your dashboard, viewing and editing the profile of the vending machine(s). With warehouse management you can keep track of your product stock at all times. You can set the maximum capacity and the actual loaded quantity for each individual engine.

MAXIMUM

DATA ACCURACY

If a red triangle appears in

the 'quantity' column, this

indicates that the data in the column does not match the data entered. For example, if the system detects that the column is

empty but a quantity has

been entered, the

dashboard will report an

inconsistency.
