AND CLOSING SENSOR

drawer compartment
dimensions:
15,5W x 14,9H
13,9D cm

dimensions:
25W x 183H
21D cm

The Locker is perfect for all those occasions when the customer **orders online** and needs a pick-up that is not time-limited. It is therefore perfect for environments such as pharmacies, self 24 areas, hemp and ecig shops.

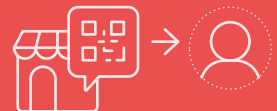

How does it work?

1 The customer interested in a product contacts you via website, social media or telephone. The customer needs the product pick-up to be timetable-free.

2 The customer books the product and can choose to pay on the website or directly at the vending machine.

3 The retailer generates a dedicated QR code which it sends to the customer.

4 The customer with the QR code received goes to the chosen locker to collect the product.

SLAVE module

FOR THE WORLD OF PHARMACIES AND PARAPHARMACIES

Fulfills the need
to pick up an
over-the-counter
medicine on any day
of the week or pick up
a product purchased
from your pharmacy's
e-commerce.

FOR THE LEGAL HEMP SECTOR

Offer your
customers the
possibility of picking
up products at any
time, even with larger
packaging that
conveniently fit in the
locker.

FOR THE ELECTRONIC CIGARETTES SECTOR

If customers run out
of their favourite ecig
liquid, they can
schedule pick-up at
the locker when they
wish.
